

What to do if Your Email is Compromised

6 Things to do if your email is compromised:

1. Change your email password, and any other account passwords tied to your email address.
2. Log out of your email on all devices.
3. Set up Multi-Factor Authentication for your email and other accounts.
4. Notify those on your email list that your account was compromised.
5. Set up a schedule to review and change passwords and security questions periodically.
6. Scan your computer for malware and viruses.
