QR Codes

A barcode-like pattern scannable by your phone that contain various forms of data, like menus at restaurants, website links, account information, phone numbers, coupons, and phishing opportunities!

Stay safe when using QR codes!

Check the URL for typos, out-of-place punctuation, or otherwise strange characters.

Never give personal info (SSN, credentials, other PII) to a QR code site.

Avoid making payments via QR code; only make payments via trusted websites.

Always Download QR code readers / scanners from a reliable source!
