

URL Phishing

Scammers disguise URLs in email, text messages, and ads to trick users into visiting malicious websites. Learn how to spot these phishing URLs:

To trick you, scammers use hyphens and symbols in malicious links along with the known brand. For example...

<https://www.cybersafework.com>

Is that really the URL you're looking for? Scammers use symbols and characters to disguise malicious URLs!

These are NOT the correct links!

[cybersafe-work.com](https://www.cybersafe-work.com)

[cybersafework.com](https://www.cybersafework.com)

[cybersafework.com](https://www.cybersafework.com)
