

# A virus is more than a cold. Is your device infected?

Malware infections don't just slow your computer down—they put your data, privacy, and security at risk.

**Know the signs before it's too late!**

- 🚨 Slow Performance
- 🚨 Frequent Crashes or Freezes
- 🚨 Unwanted Pop-ups
- 🚨 New or Unknown Programs
- 🚨 Unusual Network Activity
- 🚨 Security Warnings from Your Antivirus

## Protect Yourself

- ✓ Run a Full System Scan – Use trusted antivirus software
- ✓ Uninstall Suspicious Programs
- ✓ Change Your Passwords
- ✓ Update Your Software – Old software can have vulnerabilities
- ✓ If you suspect an infection, disconnect from the internet
